	Examiner Craig E. Church	Art Unit 2882	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 11 are not meaningful since they define the invention in terms of the x-ray source which is not claimed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Holmstrom (3784837). Holmstrom discloses an x-ray source support comprising a ceiling holder including a mounting device 5 rotatable about axis 15, support arm 7/9 secured to the mounting device such that the x-ray source is rotatably secured to the support arm about a horizontal axis 8, wherein a lower edge of the mounting device 3 and a lower edge of the support arm 7 are below the horizontal axis of rotation of the x-ray source and wherein the axis of rotation is such that the lower edge of the x-ray source is below the lower edge of the support arm and the lower edge of the mounting device. Arm 7 may be horizontal, and arms 7 and 9 may be at right angles. The claims are rejected to the extent they are definite.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holmstrom. Holmstrom does not teach that the mounting device is vertically adjustable, but it would have been obvious to make it so in order to accommodate patients or patient supports of different sizes.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
